Selected Refereed Publications

Papers in Refereed Journals

Audirac I. 2005. "Information Technology and Urban Form: Challenges to Smart Growth." *International Regional Science Review*. Vol. 28, No. 2, (April) 119- 145.

¹ This a 10-page abridged CV, a complete version is available upon request to: iaudirac@fsu.edu

- Reviews current research regarding information technology's impact on urban form; identifies the newest information age landscapes associated with these impacts and the challenges that they pose to Smart Growth policies.

Audirac, I. 2003. "Information Age Landscapes Outside the Developed World: Bangalore, India and Guadalajara, Mexico: Nodes in the Informational/Global Economy." *Journal of the American Planning Association*, Vol. 69, No.1(Winter): 16-32.

- A study of two "silicon valleys" outside the developed world showing that are part of the edge-city phenomenon in developing countries and globally integrated in a new 24-hour planetary unit of production.

Audirac, I. and J. Fitzgerald. 2003. "Information Technology and Urban Form: An Annotated Bibliography of the Urban Deconcentration and Economic Restructuring Literatures." Council of Planning Librarians Bibliography 369, *Journal of Planning Literature*, Vol. 17, No. 4 (May 2003): 480-511.

- A comprehensive annotated bibliography of urban deconcentration and economic restructuring literatures concerning the interplay of information technology and urban form. Emerging themes are classified into various post-industrial urbanization research, economic, transportation, and spatial synergies, and IT and telecommunications policy and planning.

Audirac, I. 2002. "Information Technology and Urban Form." *Journal of Planning Literature*, Vol. 17, No.2. (November 2002): 212-226.

- Reviews paradigmatic differences and findings of two major schools of thought (urban deconcentration and economic restructuring) concerning implications of information technology on society and metropolitan form.

Audirac, I. 1999. "Stated Preference for Pedestrian Proximity to Community Facilities: an Assessment of New Urbanism 'Sense of Community'." *Journal of Planning Education and Research*, 19:53-66.

- Empirical test of New Urbanism's assumption using a state-wide survey of Floridians. It investigates the willingness to live in smaller lots in exchange for pedestrian proximity to five neighborhood amenities. The analysis finds contradicting evidence for new urbanist assumptions about suburban preferences.

Audirac, I. and A.H. Shermeyen. 1994. "An Evaluation of Neotraditional Design's Social Prescription: Postmodern Placebo or Remedy for Metropolitan Malaise?" *Journal of Planning Education and Research*, 17: 161-173.

- Examines the social claims of TND (traditional neighborhood design—New Urbanism) principles focusing using Seaside, Fl. as a case study. It points at the problematic nature of such claims given previous findings obtained from planned communities and neighborhood research.

Audirac, I., A. H. Shermeyen, and M. T. Smith. 1992. "Is the Development Debate of the 1990s to Resonate as a Fanfare for Community?" *Journal of the American Planning Association*, 58, 4, (Autumn): 514-516.

- A rejoinder to Michael Neuman's critique of authors' *Journal of the American Planning Association*, 56 (Autumn), 1991 article.

Audirac, I. and M. T. Smith. 1991. "Urban Form and Residential Choice. Preference for Urban Density in Florida." *Journal of Architectural Planning and Research*, Vol. 9, 1 (Spring): 19-32.

- Empirically assesses Floridians' preference for low versus high density environments and their willingness to trade off less consumption of private lot size for more public park space. Discusses implications for Florida's growth management policies.

Audirac, I., A.H. Shermeyen and M.T. Smith. 1990 "Ideal Urban Form and Visions of the Good Life: Florida's Growth Management Dilemma." *Journal of the American Planning Association*, 56 (Autumn): 470-482.

- A critical examination of sprawl and compact urban form as the basis for Florida's growth management implementation.

Submitted

Audirac, I. 2006. "Accessing Transit as Universal Design." Paper submitted to the *Journal of Planning Literature*.

- Reviews the different dimensions of the universal design paradigm with a focus on public transit.

Refereed Proceedings

Thompson G. L. and I. Audirac 2000. "The Type of TODs that Matters to Light Rail" Pp. E-14/1 - E-14/13 in *Proceedings of The Eight Joint Conference on Light Rail Transit, Transportation Research Board, National Research Council: Washington D.C.*

- Uses a direct demand model to test four urban growth scenarios. It assesses whether locating a significant amount of future growth in a rapidly-growing metropolis within walking distance of light rail stations would actually make a significant difference in transit patronage. Finds increases of linked-transit trips for all scenarios but not an overall decrease in auto use.

Books

Audirac, I. 1997 (editor). *Rural Sustainable Development in America*, New York: John Wiley & Sons.

- Examines underpinnings of rural sustainable development and community sustainability and offers examples from different regions of the US and Canada.

Book Chapters

Audirac, I. 1999. "Unsettled Views About the Fringe: Rural-Urban or Urban-Rural Frontiers?" Pp. 7-32 in *Contested Countryside: The Rural Urban Fringe in North America*. Owen Furuseth and Mark Lapping (editors). Hampshire, England: Avebury, Ashgate Publishing Group.

- It reviews salient conceptualizations of the structure and change of the metropolitan fringe and the challenges that exurbanization poses to growth management and urban containment policies.

Audirac, I. 1997. "Rural Sustainable Development A Postmodern Alternative." Pp. 3-24 in *Rural Sustainable Development in America*, Ivonne Audirac (ed.). New York: John Wiley & Sons.

- Offers the conceptual backdrop for the book and overviews some of the major issues at the junction of rurality and sustainability.

Boswell, Michael and Ivonne Audirac. 1997. "Rural Sustainable Development: A New Regionalism?" Pp. 273-284 in *Rural Sustainable Development in America*, Ivonne Audirac (ed.). New York: John Wiley & Sons.

- Introduces the third part of the book and reasserts the need for a new regionalism implied by sustainable development.
